DAObox Unveils Web3Wrap and Enhances DAO Services at Web Summit 2023

Web Summit, scheduled for November 13-16, 2023, will mark a significant moment for DAObox as they introduce an alpha version of Web3Wrap, a practical tool designed to simplify contract creation and signing. DAObox is actively developing an interconnected ecosystem of services and products for web3 organizations, emphasizing their commitment to industry advancement.

"Web3 and DAO entities are often entangled in a complicated legal landscape that can be especially challenging for smaller teams to manage. Our mission is to simplify this process through user-friendly, automated solutions tailored to navigate these complex legal structures. Drawing from our years of experience as legal professionals in fintech and Web3, we have crafted the alpha version of Web3Wrap. This innovative tool provides Web3 and DAO organizations the ability to create legal vaults for various needs, functioning as a trust instrument. It's a straightforward, elegant solution designed to streamline legal processes in the digital age». ©Pavel Batishchev, co-founder of DAObox.

Introducing Web3Wrap

Web3Wrap, brought to you by DAObox, is a user-friendly platform designed to streamline contract creation and agreements within the Web3 ecosystem. This tool allows users to effortlessly generate customized contracts and legal documents by simply responding to a series of straightforward questions. What sets Web3Wrap apart is its seamless integration with digital wallets and email signatures, making it a convenient and secure solution for managing legal processes in the Web3 world.

DAObox Services

DAObox offers an array of services at the core of its mission to empower Web3 organizations. Specializing in the streamlined creation and management of legal entities for DAOs, DAObox focuses on crafting decentralized and robust DAO structures with a strong emphasis on governance and asset protection. DAObox manages the complete legal wrapper formation process, and assumes pivotal roles as directors and supervisors, ensuring the seamless operation of the DAO. These services are key building blocks within DAObox's broader Web3 ecosystem, dedicated to the support and enhancement of Web3 organizations and DAOs.

Building an Ecosystem

In addition to these developments, DAObox has ambitious plans for the next development cycle in 2024-2025. These plans include the launch of innovative products like RWA Tokenization Platform, BlackBox, DAOboard, DAObox Verify, DAOPay, and the establishment of the Web3 Arbitration Institute. These upcoming additions are designed to enhance the capabilities of Web3 organizations by providing streamlined legal, financial, and operational solutions.

Collaboration and Partnerships

At DAObox, collaboration and partnerships are highly valued, as the company seeks to work closely with industry professionals, angel investors, and potential strategic allies who share a common vision for the future of Web3. DAObox acknowledges the substantial potential of collective innovation in advancing the Web3 ecosystem. The company is open to discussions regarding investment opportunities and growth prospects and invites attendees to connect with DAObox at Web Summit.

"At this pivotal juncture in our journey, we're set to navigate the Web3 landscape by curating a select group of strategic investors and ushering in our seed funding round. We wholeheartedly believe in the power of strategic partnerships and investments to nurture innovation and fortify the Web3 community." - Sergey Ostrovskiy, co-founder of DAObox.

Who is DAObox?

DAObox, a dedicated company in the Web3 space, focuses on delivering essential services for DAOs, including legal entity formation and management, while also developing tailored products to meet the specific needs of Web3 projects.
