Inspira secures its seed investment round, months after winning the 2023 PITCH competition in Lisbon. As we enter the final preparation weeks before the Web Summit 2024 in Lisbon this november, Inspira announces the completion of its seed investment round with local and international investors.

The company, founded by lawyers, designed a vertical and specific AI-driven assistant for legal professionals in law firms and inhouse teams in corporations. Being one of the most promising industries to undergo a tremendous transformation in the generative AI era, the legal market has been growing at a fast pace (US\$ +35 billion by 2026). That is exactly the opportunity Inspira has been attacking.

Due to the exposure from Web Summit, Inspira has participated in different mentoring programs and IA accelerators. In the last year, Inspira has doubled in headcount and is aiming to finish the year with 200% growth rate, namely considering the expansion in number of clients and organic growth.

The secured investment round targets accelerating growth both in Brazil and Europe and enhancing the product with the best technology available. The mission carries on: allow users to save time on legal work with artificial intelligence.

Inspira's team will be attending the event this year as a Beta startup, a clear upgrade from last year's Alpha position. At this year's PITCH competition semi-finals, part of the founding team will be featured in the centre stage as to share their path since last year.
