

FOR IMMEDIATE RELEASE

Jsonify Announces Open Access: Revolutionizing Data Management for Businesses Worldwide

[Lisbon, November 2024] – Jsonify, the pioneering technology firm that has transformed the way businesses automate their web data pipelines, is thrilled to announce its transition from beta to open access, with free trials of the platform available. This significant milestone, launched at Web Summit 2024, marks a new era for companies worldwide, offering an unparalleled solution to automate complex multi-step data workflows, thus allowing teams to focus on what truly matters.

Founded by a team of AI enthusiasts, Jsonify has been at the forefront of innovation in data automation. The company's mission to eliminate the tedium of manual data tasks has culminated in the development of a platform that is not only powerful but also accessible to businesses of all sizes.

"Our journey began with a simple vision: to automate away the boring-but-necessary data tasks that bog down teams and stifle innovation," said Paul Hunkin, Founder of Jsonify. "Today, we're proud to say that Jsonify is not just a vision but a reality. Our platform is now open to all, ready to transform how businesses interact with data."

Jsonify's platform boasts a suite of features designed to streamline data management processes. With the ability to create flexible workflows through a no-code dashboard, businesses can extract structured data from thousands of web pages, turn PDFs and DOCX files into meaningful data, and even turn any website into an API. This is made possible by leveraging the latest AI vision and code-generation algorithms, ensuring that Jsonify's data extraction is as accurate as it is efficient.

Jsonify's commitment to innovation and ease of use is evident in its integrated, user-friendly platform, which supports integration with popular tools like Airtable and Google Sheets. This ensures that businesses can easily incorporate Jsonify into their existing workflows, enhancing productivity and data accuracy.

As Jsonify opens its doors to the world, it stands ready to support businesses in their quest for efficient, automated data management. With a global audience in mind, Jsonify is poised to become an indispensable tool for companies looking to harness the power of their data without the traditional hassles of data collection and maintenance.
