PRESS RELEASE WEB SUMMIT 2024

WPT Energy Revives Nikola Tesla's Vision of Wireless Power Transmission at Web Summit Lisbon

Lisbon, November 12, 2024 - WPT Energy, an innovative startup specializing in high-power, high-voltage wireless power transfer solutions, is set to showcase its groundbreaking technology at this year's Web Summit in Lisbon. Drawing inspiration from the pioneering work of Nikola Tesla, the company is breathing new life into the concept of wireless energy transmission, bringing it into the modern age for applications such as electric vehicles and industrial systems.

Nikola Tesla, renowned for his visionary ideas, first conceived the possibility of transmitting power wirelessly over a century ago. Today, WPT Energy is making this dream a reality, with cutting-edge systems designed to wirelessly transfer energy across distances and angles with unprecedented efficiency.

We invite innovators, media professionals, researchers, company representatives, and investors to join us for an exclusive live demonstration of our technology at the Serbian Pavilion on November 12, 2024. The demonstration will feature:

- Wireless Parking for EV - model
- Dynamic Wireless Charging Road for in-motion EV charging - model
- Wireless Charger for EV - prototype

Participants will have the opportunity to engage with the technology firsthand, gaining insight into its applications, benefits, and the future potential of wireless energy transfer. Our team of experts will be on hand to explain the technology, its customizable features, and how it can revolutionize industries that rely on efficient power solutions.

Date: November 12, 2024

Location: Serbian Pavilion, Web Summit, Lisbon

Join WPT Energy as we bring Tesla's dream of wireless power transmission into the 21st century. We look forward to sharing our innovations and discussing how this cutting-edge technology can shape the future of electric mobility and beyond.

For more information, visit www.wptenergy.com or contact us at office@wptenergy.com or through the official Web Summit application.

About WPT Energy

WPT Energy specializes in designing and building custom systems for high-power, high-voltage wireless power transfer, with applications across electric vehicles, industrial automation, and more. With a focus on efficiency, flexibility, and innovation, WPT Energy is leading the charge in bringing wireless power solutions to the global stage.

This press release introduces the significance of WPT Energy's work and invites key participants to attend the demonstration at Web Summit, tying it back to Tesla's original vision.
