

For Immediate Release - November 08, 2025

At Web Summit Lisbon 2025, AIP Genius Announces Its \$10 Million Series A Fundraising Round.

Lisbon, Portugal — Web Summit Lisbon 2025 — AIP Genius, an AI-powered platform transforming how intellectual property (IP) is managed and protected, announced today the opening of its **\$10 million Series A fundraising round**. The company aims to accelerate the global rollout of its **AI-native ecosystem** for IP advisory, prosecution, and management, addressing a **\$12 billion global IP industry** growing at 12% CAGR.

This announcement follows AIP Genius's successful seed funding of **\$1.5 million**, which enabled the delivery of its live product suite and the onboarding of over 20 clients — with 50 more in the pipeline. The company is now in advanced negotiations with **international IP owners** for the deployment of AIP AMS, and with **one of the main IP offices** for the implementation of AIT (the "Just 5x5" model).

Founded by **Hady M. Khawand**, a visionary IP leader and entrepreneur known for creating demand for innovative services and for being a passionate advocate of continuous Human-AI synergy, AIP Genius is supported by a team of seasoned IP and technology executives with decades of combined expertise and guided by senior C-suite advisors.

AIP Genius is redefining the future of IP through three integrated pillars:

- **AIP Nexus** – AI-powered IP advisory & prosecution platform (*live*)
- **AIP AMS** – Global IP portfolio management system (*under development*)
- **AIT** – AI automation for trademark offices (*under development*)

The **AIP ecosystem** — the only end-to-end AI solution covering the entire IP lifecycle across private and public sectors — is built on **proprietary technologies and frameworks** protected under a **pending patent, copyright, and trade secret laws**, covering the platform's AI architecture, workflow automation, and legal knowledge base.

"We're building the new infrastructure for global IP services and paving AIP Genius's path toward unicorn status," said Hady M. Khawand, Founder & CEO of AIP Genius. "Announcing our Series A at Web Summit Lisbon 2025 reflects our readiness to scale—and to welcome strategic investors who share our vision of human-AI synergy in IP."
