

## Taiwan Showcases Innovation with 11 Startups at Web Summit 2025

**LISBON, October 30, 2025** – G Camp, a startup accelerator program hosted by the Small and Medium Enterprise and Startup Administration, Ministry of Economic Affairs of Taiwan, will lead eleven outstanding Taiwanese startups to participate in **Web Summit 2025**, Europe's largest and most influential tech event. The conference will be held in Lisbon, Portugal, from **November 10 to 13, 2025**, at the MEO Arena. Together, G Camp and these startups will spotlight Taiwan's cutting-edge innovations, strengthen connections with global industries, and open up new international business opportunities.

Since 2018, G Camp has helped Taiwanese startups connect with international resources through its "International Innovation and Entrepreneurship Training Camp." Over the past eight years, it has supported more than 190 startups in expanding into 47 countries, generating over US\$25 million in business opportunities.

For this 9th cohort, G Camp collaborated with Silicon Valley's 10X Innovation Lab to host a two-day intensive training program covering venture capital ecosystems, fundraising strategies, international business negotiations, and overseas expansion planning.

Following a rigorous selection process, 25 startup teams competed in a final pitch competition in August. A panel of 10 venture capital and corporate experts from Taiwan and abroad selected the **top eleven startups** to represent Taiwan at Web Summit 2025.

**The 11 startups span diverse industries, showcasing Taiwan's broad innovative capabilities:**

- **Amelio Biomedical Co., Ltd.** – Develops biocompatible hemostatic powder to rapidly stop bleeding in trauma, battlefield, and emergency care.
- **BloodScan Biotech Inc.** – Provides Labyrinth One, the world's first liquid biopsy system comparable to tissue biopsy for earlier and personalized cancer detection.
- **Deeli AI, Inc.** – Uses AI and proprietary data to help R&D companies scout emerging technologies and connect with early-stage innovators.
- **dotbrand** – AI-powered sales agent for interior design firms, streamlining client intake, project planning, and visualization.

- **EndoSemio Co., Ltd. – Pioneers single-use wireless endoscopes for airway, urology, and ENT, improving safety and accessibility in clinical settings.**
- **Hoc-trade Technology – AI platform analyzing trading behaviors, helping traders mitigate emotional and cognitive biases to reduce losses.**
- **Megasense Technology Corp. – Develops radar and LiDAR sensors for autonomous driving and infrastructure safety, creating smarter, safer environments.**
- **MetaRosetta Co., Ltd. – Innovates meta-optical technologies and AI-based metalens solutions, reducing client time and costs while enhancing competitiveness.**
- **Package Plus Integrated Co., Ltd. (PackAge+) – Green startup offering circular packaging and return systems to reduce single-use waste.**
- **Rapid International Corp. – Provides AI-driven cybersecurity solutions, including attack simulation and insider threat monitoring, serving clients in Taiwan, Japan, and Malaysia.**
- **Sunmit Industries Inc. – Automates mattress recycling and upcycles foam into reusable packaging, reducing landfill waste and replacing single-use materials.**

### **Visit Us at Web Summit**

G Camp Taiwan is eager to connect and network with all Web Summit attendees. We invite you to visit us at Booth E117 or reach out using the contact details below to learn more about us and discuss collaboration opportunities

### **Exploring Opportunities in Portugal's Startup Ecosystems**

Beyond Web Summit, G Camp will guide Taiwanese startups to engage with Portugal's thriving innovation hub, recognized for its strengths in fintech, cleantech, deep tech, and digital solutions. Supported by a strong network of incubators, accelerators, and investors, Portugal has become one of Europe's most competitive startup ecosystems. Taiwanese teams have been invited to leading Portuguese hubs and will join an international roadshow with bilateral meetings, fostering collaborations that spark new business opportunities and enhance global competitiveness.
